### **DETAILED ACTION**

Upon further review, the previous requirement for election of species had been incomplete, and the application is required to be restricted as follows:

#### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Figs. 1-3
2. Figs. 4-5
3. Figs. 6-7
4. Fig. 8
5. Fig. 9
6. Figs. 16-17
7. Fig. 18
8. Figs. 19-20
9. Fig. 21
10. Fig. 22

11. Fig. 23

12. Figs. 24-24

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the various species enumerated above lack a single technical feature common to all. For example, Fig. 1 includes non-magnetic members 43, Fig. 4 includes exterior members 53, 54, Fig. 6 includes plated layers 30e, Fig. 8 includes filling material 33g, Fig. 16 lacks any of the previous features, etc. Thus, the claims lack the same or corresponding "special

technical feature" which provide a contribution over the prior art as required by Rule 13.2.A telephone call was made to K. Baldauf on 10/14/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
